

**國立高雄科技大學**  
National Kaohsiung University of Science and Technology

August 25, 2020

Dear Partners,

Warmest greeting from Prof. Chia-Nan Wang, Dean of International Office Affairs, National Kaohsiung University of Science and Technology (NKUST). NKUST was established on February 1, 2018 by the merger of three public universities: National Kaohsiung University of Applied Sciences (KUAS), National Kaohsiung First University of Science and Technology (NKFUST), and National Kaohsiung Marine University (NKMU). With the total number of over 28,000 students, NKUST is now the largest technological university in Taiwan.

The COVID19 pandemic is now a truly unprecedented situation and is affecting all our families, our businesses and our societies, either directly or indirectly. On behalf of the National Kaohsiung University of Science and Technology and Office of International Affairs, we would like to extend our sincere greetings to you and also to your family for the best of luck, good health and peace. We are looking forward to updating your situation, as well as express our willing to share this difficulty moment with your institution.

Our governments July 15th announced that the new students who are from 19 countries (Vietnam, Hong Kong, Macao, Thailand, Palau, Australia, New Zealand, Brunei, Fiji, Mongolia, Bhutan, Cambodia, Laos, Malaysia, Singapore, Japan, Korea, Sri Lanka and Myanmar) can enter Taiwan. As a result, NKUST International Student admission in Spring Semester 2021 is proceeding as usual now, so we would like to send you the information of International Students Scholarship for Master and Doctoral Program in Spring Semester 2021 as enclosed files. We are thankful for your consideration to introduce this program to your students as well as show in your school website or fan page.

Despite the many difficulties we all face, we hope you stay safe and we appreciate all your sharing, support and understanding during these challenging times of global health crisis.

Best regards and thank you in advance!

Chia-Nan Wang

Dean, International Office Affairs

Professor, Department of Industrial Engineering and Management
